CMS Berlin
Cleaning. Management. Services.
21 – 24 September 2021

The whole world of hygiene

As the cleaning industry's leading business platform, CMS Berlin 2021 will present the latest hygiene and cleaning solutions, services, machines, accessories and consumables.

Cleanliness forms the basis for hygiene. For that reason, and against the backdrop of the Sars-Cov-2 pandemic, carrying out professional cleaning in highly frequented public spaces and commercial areas as well as sensitive areas is key to protecting public health. That is why cleaning services providers occupy an especially important role in bringing society and the economy back to life and safeguarding their future.

Taking place in Berlin, Europe's most successful event for the cleaning and hygiene industry presents

- highly efficient cleaning, hygiene and disinfectant products
- filters and accessories for improving air quality and ensuring a pathogen-free environment (HEPA)
- machines for disinfecting and cleaning public spaces and sensitive areas
- personal protective equipment (PPE) and corresponding procurement processes
- high-quality products and solutions for optimum protection of employee and public health
- technical and organisational hygiene solutions for improving hygiene standards and maintaining quality in cleaning

The building commercial cleaning industry

One of Europe's most important service sectors

- over 280,000 companies
- more than 4 million employees
- turnover in excess of EUR 120 billion

/ HYGIENE COMPETENCE

CMS BERLIN 2021

The meeting place for the hygiene industry

For cleaning professionals and hygiene managers representing

- **healthcare:** hospitals, nursing care homes, medical practices
- **the public sector:** local government and authorities, universities, schools, nurseries
- **commerce:** offices, the retail trade, hotel industry, catering, industry in general
- **the transport sector:** buses, trains, aviation

CMS Berlin provides a detailed market overview of products that meet the latest requirements. Innovative, technical and organisational hygiene solutions and cleaning products can help to successfully implement higher health safety standards worldwide.

The expert platform for the hygiene industry

- for professional cleaning and disinfection
- for implementing higher standards and new solutions
- for communicating know-how to optimise the latest work and cleaning procedures
- for applying PPE products, especially solutions in times of the Sars-Cov-2 pandemic
- for individual logistics and procurement processes

**Hygiene -
the most effective
way to prevent
infection**
