

Dr. Axel Korge

Axel Korge, born in 1955, lives with his family in a suburb of Stuttgart. The mechanical engineer is extending the topic of production organization together with partners from industry and science. Axel Korge develops methods, use cases and procedures for the realization and economic operation of industry 4.0 and linked, cognitive production systems. He is convinced that in a less hierarchical organization there is huge potential for companies, employees and executives. He blogs his findings at <https://blog.iao.fraunhofer.de/tag/dialog-arbeitswelt-4-0-in-baden-wuerttemberg/>
