

Speaker

Christoph Berlin

Christoph Berlin is the Principal Group Program Manager and business owner of Manufacturing in the Azure IoT Engineering at Microsoft Corporation. His team is responsible for product management, strategic engagements and growth for the Manufacturing vertical including: Discrete and Process Manufacturing, Industrie 4.0, China 2025 and other initiatives around Industrial IoT, the Intelligent Cloud and Intelligent Edge. He also manages strategic customer/partner engagements for all of Azure IoT across verticals and is responsible for business growth.

Christoph and his team have been instrumental to drive digital transformation in many German manufacturers. Before joining Microsoft, Christoph was VP of Product Management for various startups, including hopTo Inc., a leader in mobile productivity solutions.

Prior, Christoph was a member of the XenSource Ltd. senior staff, a virtualization startup (XEN hypervisor) where he was responsible for OEM partner development and strategy. Christoph holds a master's in computer science and communication from Darmstadt University, Germany.
